

Paper filters are no longer available for the 'longer filter bowl' on the Tankmaster Mark 1.

It is possible to use the plastic filter kit supplied for the Tankmaster Mark II on the Tankmaster Mark I by using a small cable tie/zip tie placed around the centre retaining screw in such a way as to support the plastic filter up against the Tankmaster Body.

The upper and lower 'O' rings supplied with the Tankmaster Mark II Filter Replacement Kit, TM4660F, can be used on the Tankmaster Mark I successfully.
