

Atkinson

EQUIPMENT LIMITED

The Atkinson Fuel Box has been developed to add value to a popular industry refuelling product.

The Swiss 60lpm self-priming pump with Flow Meter has a three

year return to supplier warranty. The Fuel Box is available in 230v / 12v / 24v or 110V The Atkinson Fuel Box is

supplied with a 4m delivery hose Automatic nozzle, foot valve and swivel tail for the Nozzle.

Unique to the Atkinson Fuel Box is the on/off switch, when the Auto Nozzle is remove from the

fuel Box the pump automatically switches on, just like a forecourt pump, then when the nozzle is replaced, the pump is automatically switched off. There is pad lock fixing in the switch lever so

that the nozzle can be locked secure when the pump is not in use. Atkinson Equipment offer OEM customers that are interested in the fuel box a bespoke kit service to suit their application.
