

**PRODUCT SPECIFICATION SHEET**

Giuliani Anello 3/8" Water Trap Filter for Heating Oil

**BRAND:**

**TOP SPEC:**

100 Micron  
S/Steel Element

**PAGE**

1/1

**Product Description**

Now there is a filter that allows you to easily drain off any water collected from your heating oil. When you see any trapped water in the filter bowl simply open a valve to drain this off. Works as a particulate filter with the facility to view and drain off trapped water.

The filter is available with a wall bracket and 2x compression fittings to allow you to connect it to your pipework. A roll of PTFE joining tape can also be supplied.

We also supply the replacement filter elements and the O-ring seal for the filter bowl.

Dimensions of the filter:

80mm across the top - from inlet port to outlet port.

136mm from the top of the filter to the bottom of the small drain tap.

**Main Features**

- Connection Size - 3/8" BSP Threaded
- Filter Element - 100 Micron S/S Element
- Works as a particulate filter with the facility to view and drain off trapped water.
