

PRODUCT SPECIFICATION SHEET

Groz Water/Particulate Block Fuel Tank Filter

BRAND:

MAX WORKING PRESSURE:

150PSI

SIZE:

1" BSP

Product Description

A range of Fuel tank Filter to suit different types of fuels in agricultural & industrial applications. Durable & lightweight design for easy installation on mobile & stationary fuel tanks and on gasoline & diesel fuel pumps.

A transparent polycarbonate bowl provides a visual aid to inspection the filter and a water-drain plug is provided in order to release any water that settles in the bottom of the bowl.

This fuel tank filter comes complete with a water-block 10-micron element and a replacement water block & particulate filter element is available, also is a 10-micron particulate only version.

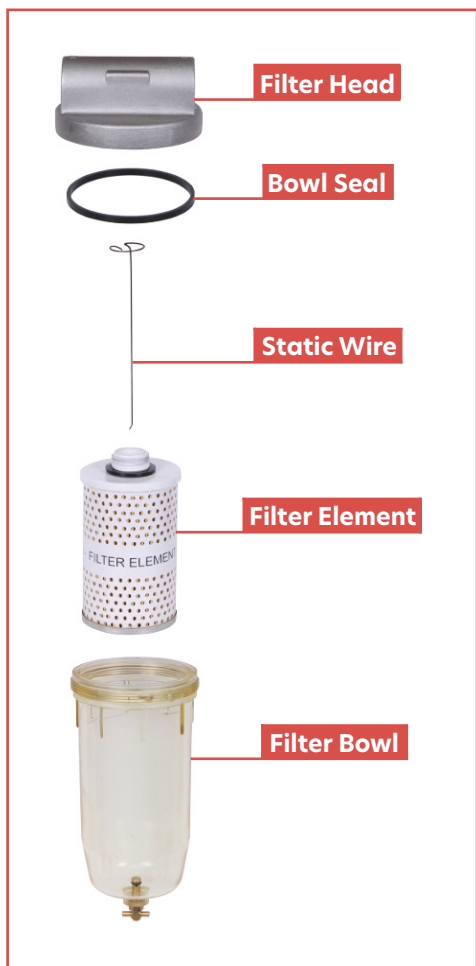

The water block filter element is impregnated with a water-absorbing polymer that absorbs and traps any water that comes into contact with it.

Suitable for use with most fuels, including Diesel, Bio-diesel, Petrol, and Kerosene.

Features

- Connection size - 1" BSP Threaded
- Dimensions - 9.5" Height + 4" Diameter
- Suitable for - Diesel, Bio Diesel, Petrol & Kerosene
- Replacement & Service Kits Available

Spare Parts
