## DESCRIPTION

In an oil heating system using a Tigerloop Plus, all oil passes through the automatic oil de-aerator, which effectively removes all gas/air bubbles from the system. This eliminates oil pump and nozzle problems associated with gas/air in the oil.

The Tigerloop Plus has been developed to meet the highest demands for cleaner air-free oil. The flagship of the Tigerloop range, the smart, all-in-one design includes a vacuum gauge for full control and simple troubleshooting, a shut off valve for easy service and a Spin-on paper filter for the toughest filtration needs. This unit has an extremely large filtration area of 1850 cm<sup>2</sup> with a filtration grade of 20 microns.

## FEATURES

- Automatic de-aerator for oil burner
- Maximum operating temperature of 60°C
- Comes complete with filter bowl and filter element
- Suitable for oil and kerosene
- 3/8" F BSP Inlet/Outlet
- Comes complete with wall bracket in box
