DESCRIPTION

The Piusi K400 digital fuel flow meter is designed to measure the quantity of diesel, oil or windscreen fluid that has been used. This accurate oval gear fuel counter meter is popular for the dispensing of oil in garage and workshop environments, as well as the low flow diesel transfer applications.

There are two separate versions available of this fuel flow meter; one for use with diesel and oil, and another for windscreen fluid. Both models are also available integrated into a nozzle for the user's simplest viewing

FEATURES

- Digital fuel flow meter
- Oval gear system
- Electronic display
- Working temperature -10°C/+60°C
- Suitable for diesel and oil
- Flow rate: 1-30ltrs Per Min
- ½" F BSP Inlet/Outlet
- Accuracy +/-0.5% after calibration
- 5 digit partial and 6 digit totaliser

PART NUMBER	DESCRIPTION	SPECIFICATIONS	PRICE
P8-F00484000	Piusi K400 - Oil and Diesel Fuel Flow Meter	<ul style="list-style-type: none">• Max Flow (lpm) - 30• Pressure (bar)-(psi) 70-994• Fluid Viscosity: 5-5000 cSt• Max Fluid Temperature - +60°C• 1/2" F BSP• 5 digit resettable totaliser• 6 digit non-resettable totaliser	£138.12
