DESCRIPTION

The Piusi Vantage DC portable diesel transfer pump has been designed to satisfy the requirements for the on-board refuelling on plant machinery and equipment. Thanks to their new level of intelligence, these 24v and 12v fuel transfer pumps monitor their own operation and performance and slow the refuelling pump down as it gets hot. The Vantage DC diesel transfer pump has an electronic control box which comes mounted as standard on top of the pump, but can be mounted remotely if required. The refuelling pump comes with an LED for monitoring operation status and stored memory events.

This cast iron, rotary vane 24 or 12 volt fuel transfer pump has an incorporated bypass valve and pump attachment support bracket. This Piusi pump is innovative in design and compact in size, and with the optional accessories available (see accessories table), it can be mounted multiple ways.

FEATURES

- Self-Priming BP3000 Diesel Fuel Transfer Pump
- Cast iron pump body with anti-corrosion paint
- Direct current brush motor with permanent magnet stator
- Protection grade: IP55
- Local memory
- 3/4" push fit inlet/outlet (connection accessories required)
- Sintered steel rotor and acetal resin vanes
- Incorporated bypass valve
- Flow rate: 60ltr Per Min (depending on model)
- Operation status LED
- Run dry protection
- Available in 12v/24v
