## DESCRIPTION

The Piusi wall mountible diesel transfer pumps are a simple, ready to fit refuelling kit, which can be connected to new or existing static or mobile fuel storage tanks. This Piusi pump unit, which comes complete with a hose and nozzle, can also be mounted directly onto the tank or on a wall piped back into a tank. These diesel transfer pumps are popular for the refuelling of fleets, but can also be used in any non-resale refuelling environment due to their compact size and flexible nature.

This versatile electric fuel transfer pump kit can be supplied in various configurations, which differ depending upon the pump and nozzle flow rate, and whether metering is required. Please see the products brochure page and the drop down menu for the various available configurations.

## FEATURES

- Plated fuel dispenser pump kit
- Incorporated bypass valve
- Flow rate: 56-90ltr per min (depending on model)
- Optional mechanical K33 flow meter
- Panther, E80 or E120 diesel transfer pump
- 4m delivery hose & check valve
- Automatic nozzle c/w nozzle support
- Available in 230v/12v/24v
