THE REVAMPED SELF SERVICE SOFTWARE
MODERN, ATTRACTIVE & USER FRIENDLY INTERFACE

Piusi Self Service Desk 2018 PC Software

PIUSI ®

The Self Service Desk 2018 PC software is a revamped version of the market known Self Service Desk, bringing it up to date with modern visuals. The functionality of the 2018 software is identical to the previous Self Service Desk with all of the familiar features, but benefits from a more modern, attractive and user friendly interface at the computer screen.

Features...

»	Software for use with the Piusi MC Box, Cube & Self Service fuel management system units
»	Same familiar functionality as the original Self Service Desk with a modern, attractive & user friendly interface
»	Allows transaction data e.g. what driver, took how much fuel and when to be conveniently viewed on a PC
»	The 'Site' screen pictorially displays the units you have on site, which you can name for easy identification
»	The 'Report' screen is where you are able to select and filter by dates, drivers, vehicles and/or dispensers and simply view the reports in a table and in a graph format
»	Ability to export reports into your preferred .pdf, .xlsx or .txt file format
»	Software can be downloaded from the Piusi website using your allocated licence key or run off a USB
»	Data can be transferred through hardwiring or a key reader connected to the PC via USB
»	If upgrading from the original Self Service Desk, you can migrate your old data to ensure no history is lost
»	Additional user keys are available if you have more drivers/vehicles than the supplied 10 keys

Should I go for the download or USB version?

› **Download** – Recommended, unless there is no internet on site to download the software. You are given a licence number to enter to allow the download from the Piusi website. If you ever need to reinstall the software, contact us or Piusi to re-issue the licence free of charge.

› **USB** – If you don't have internet connection on site to download the software we can offer you the USB version. You are supplied with a USB to run the software off, which means if you lose or break your USB, a replacement needs to be purchased.
