DESCRIPTION

The Piusi E80 electric diesel transfer pumps are Italian manufactured refuelling pumps known in the market for their quality construction and reliability. This powerful, self-priming rotary vane diesel fuel transfer pump is designed for private, industrial uses such as fixed fuel dispensing systems on bunded fuel storage tanks. The good flow rate associated with this diesel dispensing pump provides a quick vehicle refuelling solution.

Available in both single and three phase, this mains powered Piusi pump consists of a pump head, motor and have an incorporated bypass valve. This 1" BSP flanged diesel transfer pump is supplied with a simple on/off button, and thanks to its thermal motor overload protection is suitable for continuous running.

FEATURES

- Self-priming electric fuel transfer pump
- Cast iron pump body with anti-corrosion paint
- Flow rate: 75ltr Per Min
- Continuous running
- 1" F BSP inlet/outlet ports
- Sintered steel rotor & acetal resin vanes
- Incorporated bypass valve & Viton lip seal
- On/off switch
- Thermal motor overload protection
- Protection grade: IP55
