DESCRIPTION

OCIO is a tank level indicator for fuel and oil that detects the static pressure generated by the fluid height by means of a tube inserted into the tank and displays the fluid level or volume.

The system consists of:

- A control unit for displaying the level and managing the system. The unit is equipped with an intuitive, complete software and permits the connection of two alarm or lock devices.
- A tube for detecting static pressure: The tube end is inserted from the top of the tank and lowered down into the liquid until it touches the bottom.

The software is used to:

- Set tank dimensions and type
- Define indication level
- Define alarm levels
- Calibrate the instrument
- Define measurement unit

FEATURES

- Electronic fuel tank contents gauge
- Tank probe with 10 metres capillary
- For tanks between 600-4000mm
- High/low level statuses can be set up
- IP54 Rated
- %, litre and mm readings
- 1/2" M BSP balance chamber fitting
- Accuracy +/-1%
- C/w two relays for connection to other equipment
- Suitable for diesel, water or AdBlue (depending on model)

| PART NUMBER | DESCRIPTION | SPECIFICATIONS | PRICE |
