

PRODUCT SPECIFICATION SHEET

Piusi EX100 Fuel Transfer ATEX Pump

BRAND:

SUITABLE FOR:

FLOW RATE:

100LPM

Product Description

PIUSI EX100 is the new pump of the EX line, suitable for the transfer of Gasoline and diesel with high performance and continuous duty. The directive on the use of materials in potentially explosive atmospheres is very precise, as confirmed by the ATEX certification. PIUSI confirms its constant commitment in the search for solutions for the transfer of fluids, to enrich its line with products with high performance in the transfer and dispensing of explosive liquids.

The PIUSI EX100 Gasoline pump is ATEX certified and complies with the current principles to prevent explosions inside or outside the pump, due to possible components that can trigger the transferred fluid or the surrounding atmosphere sometimes. PIUSI EX100 is safe, reliable over time and specific for the American market where ATEX certification is required in order to use transfer systems in potentially dangerous environments.

Features

- Flow rate of 100lpm
- ATEX certified pump Zone 1
- Weight: 25kg
- Continuous duty cycle
- Connection: 1 1/4" BSP
- Voltage 230v

Part Number	Description	Specifications
P8-F00390010	Piusi EX100 ATEX Fuel Transfer Pump 12v	Inlet: 1 1/4" BSP Max flow: 100lpm Voltage: 230v
