

PRODUCT SPECIFICATION SHEET

Piusi EX75 Fuel Transfer ATEX Pump

BRAND:

SUITABLE FOR:

FLOW RATE:

75LPM

Product Description

PIUSI EX75 is safe and reliable for use over time and is perfect in potentially explosive atmospheres. This transfer pump suitable for flammable fuels such as Gasoline, kerosene and diesel. It is easy to use, compact, and versatile and adapts to your requirements: you can use it wherever you need it.

Characterized by a solid structure with a cast iron body that ensures its robustness, the pump for transferring flammable liquids consists of a bypass valve and can dispense up to 75 l/min, with reduced absorption to ensure a long life of the PIUSI EX75 fuel transfer pump.

The anti-noise filter (EMC electromagnetic compatibility) makes the application of PIUSI EX75 simple, with a low noise level. Moreover, flanged components including pump, flow meter and filters can be mounted or replaced without the use of sealant, making connections quick and secure. Another characteristic of the PIUSI EX75 fuel transfer pump is its excellent thermal protection, while the metal suction filter keeps the pump in good condition, free from foreign matters.

Features

- Flow rate of 75lpm
- ATEX certified pump Zone 1
- Duty cycle: 30 mins on/off
- Anti-noise filter
- Connection: 1" BSP flanged
- Voltage 12v

Part Number	Description	Specifications
P8-F00380000	Piusi EX75 ATEX Fuel Transfer Pump 12v	Inlet: 1" BSP flanged Max flow: 75lpm Voltage: 12v
