

PRODUCT SPECIFICATION SHEET

Piusi Suzzara Blue Portable 12v AdBlue® Pump Kit

BRAND:

SUITABLE FOR:

FLOW RATE:

36LPM

Product Description

SUZZARABLUE PORTABLE KIT is a AdBlue® transfer kit, suitable for all those conditions in which it is not possible to dispense directly from the dispenser, as in the case of earthmoving machines which, due to their size, are unable to refill there.

Thanks to its reliability and ease of use, SUZZARABLUE PORTABLE KIT is used in all those cases in which the dispensing or transfer of AdBlue® is required in special conditions or when only a battery power supply is available.

SUZZARABLUE PORTABLE KIT for AdBlue® is the most suitable solution to transfer and fill AdBlue® quickly, cleanly, in any condition.

AdBlue® improves the performance of the diesel engine, reduces fuel consumption and nitrogen oxide (NOx) emissions produced by exhaust gases, thus preserving the environment according to the demanding specifications of ISO 22241.

Features

- Flow rate of 36lpm
- 6m delivery & 1.5m suction
- Protection grade: IP55
- Duty cycle: 20 mins
- Plastic foot valve & strainer
- Voltage: 12v Kit
