#### BRAND

## DESCRIPTION

For use on steel or bottom outlet plastic domestic heating oil tanks. Aluminium body with isolating valve, steel filter bowl and cleanable nylon filter.

The tank must be installed with at least enough clearance beneath the filter bowl to allow for maintenance of the filter, including room for a tray to collect any spillage.

This Filter valve has been fully tested and was in full working order upon leaving our works; reasonable care in fitting and subsequent servicing will ensure trouble free operation.

## FEATURES

- British made valve
- Comes complete with filter bowl and filter element
- Isolation valve included
- Serviceable part - service kit available
- 3/8" F BSP Inlet/Outlet
- 50 micron filter element
